I know Ben would appreciate crediting NOAA for sponsoring the work. Previously, he stated this:
[please credit NOAA Pacific Islands Fisheries Science Center as having provided funding for the project](#)

Also, here are a couple citations for it:

Richards, B.L., J.R. Smith, C.D. Kelley, V. Moriwake, (in review following revision), Development and Implementation of a Multibeam Backscatter and Bathymetry Synthesis for the Main Hawaiian Islands as part of a Stratified Fishery-Independent Bottomfish Survey, NOAA Technical Memorandum.

Smith, J.R. (2016) Multibeam Backscatter and Bathymetry Synthesis for the Main Hawaiian Islands, Final Technical Report, NOAA, pp. 15.

Steve,
Ben's group supported my time to put it together. He's fine with public release and its now posted on the HMRG website for download.
So yes, its fine.

Hi Chris,

I wanted to follow up from our conversation last week about using the 5m bathy synthesis for a figure in a publication.

I haven't been able to reach Ben Richards, he seems to be away on leave.

I remember you mentioning a second individual that might be able to clear it, but I can't recall the name.

Can you jog my memory?

Cheers,
Steve
