Hello Stephen

Yes you may publish results from the Vemco collision calculator in your paper. Please reference where you retrieved the information – i.e. values obtained from Vemco's on-line calculator <https://vemco.com/collision-calculator/>.

Regards
Denise

Type of Inquiry

General

Comments

I was wondering if the results from your online collision calculator (<https://vemco.com/collision-calculator/>) are copywritten and if so, is it possible to get permission to publish the results as part of my methods section in a journal article that I am submitting to PeerJ?

Cheers,
Stephen Scherrer
